

## PRODUCT INFORMATION

# CR FORM: CONCRETE MOULD RELEASE

(CODE: 7063)

### Description

Concrete work is normally formed. Hence, we refer to the oil as a release agent suitable for form materials, e.g. steel, wood, plywood, hardboard etc. A release agent is applied to formwork prior to placing concrete against the form. It provides a film at the formwork/concrete interface which facilitates stripping and at the same time minimises blemishes to the concrete surface.

### Application

An economical release agent for the manufacture of concrete slabs and pre-stressed concrete. For use on steel forms only.

### Storage

All packages should be stored under cover to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C.

### Health, Safety and Environment

Health and safety and environmental information is provided for this product in the relevant Materials Safety Data Sheet which can be obtained by contacting Royal Precision Lubricants on (03) 9553 0840.

### Typical characteristics

Density at 15°C, kg/L	0.854
Viscosity cSt at 40°C	5.2
Flash Point °C	70
Saponification Number	9.0

*Typical characteristics are only a guide to industry and are not necessarily manufacturing or marketing specifications and do not constitute a legal liability.*
