

PRODUCT INFORMATION

Eco BioSyn M2

BIODEGRADABLE *OUTBOARD* ENGINE OIL

CODE: 9035

Definition

Eco BioSyn M2 is based on synthetic base oils that are highly biodegradable. Resulting in less of an environmental impact than that of conventional 2 stroke motor oils. **Eco BioSyn M2** is a high performance, ash-less, 2-cycle engine oil developed to meet the most critical requirements of modern water cooled outboard engines.

Applications

Eco BioSyn M2 is recommended for and meets the warranty requirements of the latest high output 2-Cycle water cooled outboard engines requiring TC-W3 quality oils and is also recommended for 2-Cycle, water cooled outboard engines where TC-W2, TC-W or other general purpose lubricants are required. **Eco BioSyn M2** is suitable for adding as a premix with petrol or injecting through variable ratio oil injection systems.

Summary of Benefits

- Enhanced lubricity.
- Keeps engine parts clean.
- Minimizes piston ring sticking.
- Superior rust and corrosion protection.

Typical Characteristics

Viscosity at 100 C,(cSt)	7.8
Pour Point	-39
Flash point C	>101
Density	0.920
