

Safety Data Sheet

Issue Date: 11 January 2022 Issued by: Royal Precision Lubricants Page 1 of 6

Product: Diesel Treatment Concentrate

Section 1. Identification

Product Details

Product Identifier Diesel Treatment Concentrate

Product Code 6052
Recommended Use Fuel Additive

Manufacturer or Supplier Details

Supplier Royal Precision Lubricants Pty Ltd (ABN 72 155 989 165)
Address 40 Kimberly Road, DANDENONG SOUTH, Vic 3175

Telephone +61 3 9768 2441 Fax +61 3 9768 3325

Emergency Telephone Number +61 7 3203 2833

Section 2. Hazard(s) Identification

GHS Classification

Classified as Hazardous accotding to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety Regulations, Australia.

Classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.

Aspiration Hazard: Category 1
Eye Damage/Irritation: Category 2A
Flammable Liquids: Category 3
Skin Irritation: Category 2

Specific Target Organ Toxicity - Single Exposure: Category 3

Chronic aquatic Toxicity: Category 2

GHS Label Elements

Flame, Health Hazard, Exclamation Mark

Signal Word DANGER

Hazard Statements

Physical Hazards Not classified as a physical hazard under GHS criteria

Health Hazards Flammable liquid and vapour

May be fatal if swallowed and enters airways

Causes skin irritation

May cause drowsiness and dizziness

Toxic to aquatic life with long lasting effects

Environmental Hazards

Precautionary Statements

Prevention Keep away from heat/sparks/open flames/hot surfaces. – No smoking.

Keep container tightly closed.

Ground/bond container and receiving equipment.

Use explosion- proof electrical/ventilating/lighting/equipment.

Use only non- sparking tools. Take precautionary measures against static

discharge

Avoid breathing dust/fume/gas/mist/vapours/spray. Wash contaminated skin thoroughly after handling

Issue Date: 11 January 2022

Product: Diesel Treatment Concentrate

Use only outdoors or in a well- ventilated area.

Wear protective gloves/protective clothing/eye protection/face protection.

Response IF SWALLOWED: Immediately call a POISON CENTER or

doctor/physician.

Do NOT induce vomiting.

IF ON SKIN: Wash with plenty of soap and water. Take off

contaminated clothing and wash before reuse.

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

If skin irritation occurs: Get medical advice/attention.

IF INHALED: Remove victim to fresh air and keep at rest in a

position comfortable for breathing.

Call a POISON CENTER or doctor/physician if you feel unwell. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue

rinsing.

If eye irritation persists: Get medical advice/attention.

In case of fire: Use CO2, dry chemical or foam for extinction.

Storage Store in a well- ventilated place. Keep container tightly closed.

Keep cool. Store locked up.

Disposal Dispose of contents/container to an approved waste facility.

Supplemental label elements Not applicable

Other hazards which do not result

in classification

Not applicable

Section 3. Composition and Information on Ingredients

Chemical Nature: Highly refined mineral oils and proprietary performance additives.

The highly refined mineral oil contains <3% (w/w) DMSO-extract, according to IP346

Ingredients:

Ingredient	% (w/w)	CAS Number
Solvent naptha	27 – 35%	64742-89-8
Petroleum naptha	11 – 17%	64742-47-8
2-Ethylhexanol	5 – 11%	104-76-7
Xylene	< 8%	1330-20-7
N, N'-methylenebismorphine	< 4%	5625-90-1

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Section 4. First-aid measures

Eye contact: Flush eye with copious quantities of water.

If persistent irritation occurs, obtain medical attention.

Inhalation: Remove person from source of contamination. Apply artificial respiration if

person not breathing. If symptoms develop seek medical attention.

Skin contact: Wash affected area thoroughly with soap and water. Remove contaminated

clothing and wash before reuse or discard. If symptoms develop seek medical

attention.

If swallowed: Product can be aspirated on swallowing or following regurgitation of stomach

contents and can cause severe and potentially fatal chemical pneumonitis, which will require urgent treatment. **Do not induce vomiting** and obtain medical

advice.

Most important symptoms and effects, both acute and delayed:

Oil acne/folliculitis signs and symptoms may include formation of black pustules

and spots on the skin of exposed areas.

Swallowing may result in nausea, vomiting and/or diarrhoea.

Protection of first-aiders: When administering first aid, ensure that you are wearing the appropriate

personal protective equipment according to the incident, injury and

surroundings.

Notes to physician: Product can be aspirated on swallowing or following regurgitation of stomach

contents and can cause severe and potentially fatal chemical pneumonitis, which will require urgent treatment. Because of the risk of aspiration, induction of

vomiting and gastric lavage should be avoided.

Section 5. Fire-fighting measures

Suitable extinguishing equipment: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth

may be used for small fires only.

Do not use water in a jet.

Specific hazards during firefighting: Combustible liquid. In a fire, or if heated, a pressure increase will occur and the

container may burst with the risk of a subsequent explosion.

May produce toxic fumes if burning including possibly carbon monoxide, airborne solid and liquid particulates and gases and unidentified organic and

inorganic compounds.

Special protective equipment and precautions for firefighters:

rent and Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is

expected. Positive pressure Self-Contained Breathing Apparatus and full turn

out gear should be worn.

HazChem Code: 3Y

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:

Avoid contact with skin and eyes, use appropriate personal protective equipment. Evacuate surrounding areas if necessary. Remove all ignition

sources.

Environmental precautions: Stop leak if without risk. Use appropriate containment to avoid

environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth or other appropriate barriers. Local authorities should be advised if significant spillages cannot be

contained.

Methods and materials for containment

and cleaning up:

Slippery when spilt. Avoid accidents, clean up immediately.

Reclaim liquid directly or in an absorbent.

Soak up residue with an absorbent such as clay, sand or other suitable

material and dispose of properly.

Section 7. Handling and storage

Precautions for safe handling: Use in a well ventilated area.

Wear appropriate protective equipment (See Section 8) and clothing to avoid inhalation of fumes or mist and contact with skin and eyes.

Containers not in use should be closed.

Do not smoke.

Always wash hands after handling and prior to eating, drinking, smoking or

using the toilet.

Conditions for safe storage, including

any incompatibilities:

Classified as a Class 3 Flammable Liquid for the purposes of storage and

handling.

Keep away from aerosols, flammables, oxidising agents, corrosives and from other flammable products. Keep container tightly closed. Must be stored in a bunded, well-ventilated area, away from sunlight, ignition sources and any other sources of heat. Vapours from tanks should not be released to atmosphere. Breathing losses during storage should be

controlled by a suitable vapour treatment system. Containers, even those that have been emptied, can contain explosive vapours. Do not cut, drill, grind, weld or perform similar operations on or near containers.

Section 8. Exposure controls and personal protection

National Exposure Standards: No exposure standard has been established, however, the TWA National

> Occupational Health and Safety Commission (NOHSC) exposure standard for oil mist is 5 mg/m³. As with all chemicals, exposure should be kept to the lowest possible

level.

Biological limit values: Not available

Engineering Controls: Ventilation - Use in well ventilated areas. Where ventilation is inadequate, a local

exhaust ventilation system is required.

Personal Protective Equipment

Respiratory Protection: Normally not required, however if mists or vapours are generated in a poorly

ventilated area an approved respirator with a replaceable vapour/mist filter is

recommended.

Eye Protection: Safety glasses with side shields, goggles or full face mask as appropriate. Individual

circumstances will dictate the final choice of protection.

Skin / Body Protection: Always wear long sleeves and long trousers or coveralls, and enclosed footwear or

safety boots when handling this product. It is recommended that chemical resistant

gloves (e.g. PVC) be worn when handling this product.

Section 9. Physical and Chemical Properties

Appearance Viscous amber liquid **Melting Point** Not available **Boiling Point** Not available Vapour Pressure Not available Solubility in Water Insoluble pH Value Not applicable Specific Gravity 0.845 @ 15°C Flash Point > 45°C

Flammability Flammable Liquid Auto Ignition Temperature Not available Flammable Limits Not available

Section 10. Stability and Reactivity

Reactivity: No specific test data available for this product. Refer to Conditions to avoid and

Incompatible materials for additional information.

Chemical stability: Stable under normal conditions of storage and handling.

Possibility of hazardous

reactions:

Reacts with strong oxidising agents.

Conditions to avoid: Heat, direct sunlight, open flames, static ignition or other sources of ignition.

Incompatible Materials: Strong oxidizing agents, halogens, strong acids and strong alkalis.

Hazardous Decomposition

Under normal conditions of storage and use hazardous decomposition products are not **Products:** expected to be produced. Combustion forms carbon dioxide and, if incomplete, smoke,

carbon monoxide and nitrogen oxides.

Section 11. Toxicological information

Information given is based on data on the components and the toxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for the individual component(s). Skin and eye contact are the primary routes of exposure although exposure may occur following accidental swallowing.

Acute oral toxicity: LD50 rat: >5,000 mg/kg. Expected to be of low toxicity. **Acute toxicity**

Acute inhalation toxicity: Not considered to be an inhalation hazard under normal

conditions of use.

Acute dermal toxicity: LD50 rabbit: >5,000 mg/kg. Expected to be of low toxicity. May cause irritation to the skin that may result in redness, itchiness and swelling.

Repeated or prolonged contact may dry and defat the skin, resulting in skin irritation and

possibly lead to dermatitis.

Serious eye damage/eye

Skin corrosion/irritation

irritation

Contact may cause impaired vision, redness and tearing.

Respiratory or skin

sensitisation

Carcinogenicity

Germ cell mutagenicity

Not expected to be a skin sensitiser.

Not considered a mutagenic hazard.

Not expected to be carcinogenic.

Product contains mineral oils of types shown to be non-carcinogenic in animal skinpainting studies. Highly refined mineral oils are not classified as carcinogenic by the

International Agency for Research on Cancer (IARC).

Reproductive toxicity Not expected to impair fertility. Not expected to be developmental toxicant. Not expected to be a hazard.

STOT - single exposure STOT – repeated exposure Aspiration toxicity

Not expected to be a hazard. Not considered an aspiration hazard.

Further information Not applicable

Section 12. Ecological information

Eco toxicological data has not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

Harmful to aquatic organisms, may cause long-term adverse effects to **Ecotoxicity**

the aquatic environment. Spills may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired.

Persistence and degradability

Biodegradability Adequate data is not available to estimate the biodegradation potential

of this product.

Bioaccumulative potential

Bioaccumulation Mobility in soil

There is no evidence to suggest bioaccumulation will occur.

Liquid under most environmental conditions. If it enters soil, it will adsorb Mobility

to soil particles and will not be mobile.

Floats on water.

Other adverse effects

Additional ecological information Not applicable

Section 13. Disposal considerations

Disposal methods

Waste from residues Waste product should not be allowed to contaminate soil or ground

water or be disposed of into the environment.

Disposal should be in accordance with applicable regional, national and

local laws and regulations.

Contaminated packaging Dispose in accordance with prevailing regulations, preferably to a

recognised collector or contractor. The competence of the collector or

contractor should be established beforehand.

Special precautions for landfill or

incineration

No additional special precautions identified.

Section 14. Transport Information

National Regulations

Issue Date: 11 January 2022

ADG Classified as Dangerous Goods, according to the Australian Code for the Transport of

Dangerous Goods by Road and Rail.

UN Number: 1268

UN Proper Shipping Name: PETROLEUM DISTILLATES, N.O.S. – Light Solvent Naptha

Transport Hazard Class: 3
Packing Group: III
Hazchem Code: 3Y
EPG Number: 3A1
IERG Number: 14
Marine Pollutant: Yes

Other Information: Class 3 Flammable Liquids shall not be loaded in the same vehicle or packed in the

same freight container with Classes 1 (Explosives), 2.1 (Flammable Gases where flammable liquids and flammable gases are both in bulk), 2.3 (Toxic Gases), 4.2 (Spontaneously Combustible Substances), 5.1 (Oxidising Agents), 5.2 (Organic Peroxides), 6 (Toxic Substances, except Flammable Liquid is nitromethane), and 7 (Radioactive Substances). They may however be loaded in the same vehicle or packed in the same freight container with Classes 2.1 (Flammable Gases except where the Flammable Liquids and Flammable Gases are in bulk), 2.2 (Non-Flammable Non-Toxic

Gases), 4.1 (Flammable Solids), 4.3

(Dangerous When Wet Substances), 6 (Toxic Substances, except where Flammable Liquid is nitromethane), 8 (Corrosive Substances), 9 (Miscellaneous Dangerous Goods),

Foodstuffs or foodstuff empties.

International Regulations

IATA-DGR Classified as Dangerous Goods – See above IMDG-DGR Classified as Dangerous Goods – See above

Section 15. Regulatory Information

Standard Uniform Schedule of Medicine and Poisons

Poisons Schedule: S5

Model Work Health and Safety Regulations – Scheduled Substances

Not listed

Australian Code for the Transport of Dangerous Goods by Road and Rail (ADG Code)

Classified as Dangerous Goods – See Section 14.

Section 16. Other Information

Date of Issue Tuesday, 11 January 2022

Abbreviations ADG = Australian Dangerous Goods

GHS = Globally Harmonised System of Classification and Labelling of chemicals

IATA = International Air Transport Association

IBC = Intermediate Bulk container

IMDG = International Maritime Dangerous Goods

STEL = Short term exposure limit TWA = time weighted average

Other Information

The information contained in this SDS is as accurate as we can ascertain at this time. However, as the information is gleaned from a number of third party sources, Royal Precision Lubricants can make no warranty, guarantee or statement as to the reliability or completeness of the information. Royal Precision Lubricants will not accept liability of any damages whatsoever arising from the reliance of this information. It is the responsibility of the person handling the product to satisfy themselves as to the suitability and completeness of such information for their own use.
