

EGR Cleaner

Product Data Sheet

Exhaust Gas Recirculating Valve Cleaner

Royal Precision Lubricants EGR Cleaner has been developed to clean blocked or restricted EGR valves. Suitable for use in all diesel-powered vehicles fitted with EGR Units and is extremely effective in removing soot and build up from the entire EGR system. EGR Cleaner is also extremely effective in cleaning other engine components such as intake manifolds, throttle bodies, intake butterflies and anywhere where carbon and build up forms.

Royal Precision Lubricants EGR Cleaner dissolves soot and build up upon contact and effectively cleaning the throttle body, air intake and EGR Valve upon correct application and contact. Royal's EGR Cleaner contains no harmful cleaning agent or hydrocarbons so it cleans the entire system without billowing exhaust smoke. A typical side effect of cleaners that flood the EGR with a Hydrocarbon based solution / liquid.

EGR Cleaner is safe to use without the need to remove Turbo's or other running equipment during application.

Application Procedure:

Warm the engine to normal operating temperatures. Remove the air intake pipe to expose the air intake butterfly or throttle body. Rev the engine to a continuous 1500 RPM and slowly spray the EGR cleaner directly into the air intake butterfly. Apply at a rate of 1 squirt every 2-3 seconds. If the engine's RPM increases sharply stop applying the solution until the rev's return to 1500 RPM and then continue application

Do not increase this rate of application

Summary of Benefits:

- Suitable for use in all diesel engines fitted with EGR Units
- Harmless to all engine components including Turbo's and alike.
- Helps clean any component it passes through on the way to the EGR System.
- Typically cleans EGR units after 1 application.
- Eliminates the need to remove the EGR unit.
- Eliminates the need to reset computers or clear codes
- Restores power and improves fuel economy

Code: 6122-250

Product Size: 250ml

Typical Characteristics:

NOT CLASSIFIED AS ADANGEROUS GOODS BY THE CRITERIA OF THE ADG CODE

UN No. None Allocated
DG Class None Allocated
Subsidiary Risk(s) None Allocated

Storage:

Store in accordance with AS1940, The Storage and Handling of Flammable and Combustible Liquids. Store in a well ventilated area, removed from oxidising agents, acids, strong alkalis, heat or ignition sources. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use. Large storage areas should be bunded. Store as a Class C1 Combustible Liquid (AS1940). Before use carefully read the product label. Use of safe work practices are recommended to avoid eye or skin contact and inhalation. Observe good personal hygiene, including washing hands before eating. Prohibit eating, drinking and smoking in contaminated areas.

Health, Safety and Environment:

A Safety Data Sheet (SDS) is available for each product. Users should consult the SDS, and follow the precautions outlined and comply with all laws and regulations concerning its use and disposal. Used packaging material should not be incinerated or exposed to flame. After use, protect your environment. Do not pollute drains, soil or water with used product.

The Safety Data Sheet is available at Royal Precision Lubricants website www.royallubricants.com.au
